### KEYNOTE SPEAKERS INCLUDED

**Mr Tay Hengky**

Hengky is currently the Director for Physical Planning, Infrastructure at the Urban Redevelopment Authority of Singapore (URA). He leads a team of planners and engineers, working closely with various government agencies in Singapore to formulate appropriate planning and policy responses and reviewing them regularly in a bid to tackle the increasing complexity and challenges of planning and implementing developments and supporting infrastructures in a built-up environment.

**David Bartlett**

David was the 43rd Premier of the Australian State of Tasmania from 2008 until 2011. During his parliamentary career he also held the positions of Minister for Innovation, Science & Technology and Minister for Education & Skills. His time as Premier was characterised by bold reforms designed to lift Tasmania educational outcomes and capitalise on Tasmania's natural advantages in water, food, high speed telecommunications and renewable energy. For his work in promoting innovation and broadband infrastructure David was named by The Australian as one of Australia's Top 50 most influential people in technology.

**“** This has been probably the best conference... last year was really good and this year has been even better.  
Hari Wijeratne | A2K Technologies

**“** This is the fourth year we have attended now and every year it gets better and better. This is one of the best.  
Steve Latimer | Interflow
