ADAC VALIDATION TOOL

JUST LAUNCHED!

ADAC VALIDATION TOOL!

The ADAC validation tool is a resource to upload and validate XML output from CAD and other systems against any version of the ADAC XSD schema.

Benefits of utilising the ADAC validation tool:

- enables consistency in the submission process for contractors and suppliers.
- allows more accurate and efficient processing of that data for asset owners (councils/utilities)
- saves resources with a timely transfer of As-Con data into GIS and asset management databases.

NEW ADAC validation tool!	Plus GST
ADAC Consortium members	Free
Annual unlimited access	2,000
Single use	200

Corporate Technical Subscribers receive a 10% discount on the annual unlimited access licence.

The ADAC validation tool is offered free for consortium members in 2020-2021.
